

Strategic Planning and Implementation

If you can't figure out where you need to go, be concerned about where you may end up. Your organization depends on staying agile, yet focused, in an environment of rapid change.

Rapid Information Technology (IT) changes are affecting your people, business processes, and capabilities. Your IT budget is one of your biggest line items and it is growing. You can't continue with business as usual. You need to pay less and get more out of your information resources. You need a technology strategy and you need it now.

Burke Consortium can help. We specialize in developing strategies aligned with your mission, your budget, and the reality of your environment. We can help your organization survive and move forward.

Communications Management

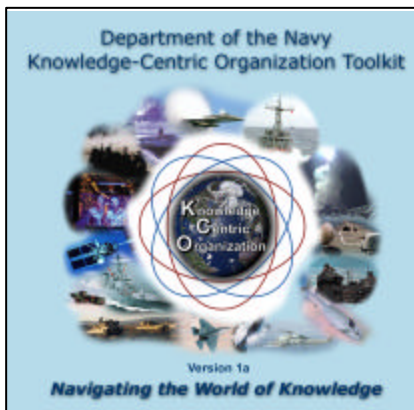

In the competitive environment of today's world, it is often difficult to stand out from the crowd, to make your presence known, and to leave a lasting impression. Burke Consortium's Communications Team can open new horizons for your organization and broaden your marketing effectiveness. Whether it be orchestrating an entire trade show or developing powerful graphics to support your display, we will ensure that your outreach initiatives are a success.

Our experienced team is prepared to analyze your requirements and produce a powerful solution to showcase your organization's products and initiatives. We have the capability to develop a wide array of multimedia products that range from engaging brochures to video production to interactive CD ROMs and multimedia websites.

Whatever your needs, Burke Consortium's Communications Team can successfully enable your organization to broadcast your IT solutions to a vast audience. Our personal touch coupled with a focus on your success is what we are all about.

Naval Sea Systems Command

**Corporate Document
Management System**

Every organization has a core group of people who consistently come through. These people shoulder the burden and form the backbone of the organization. If you're one of these people, you constantly work with others to get things done. Technology has increased your productivity. E-mail allows you to get information to others so they can act. Still you're faced with reconciling comments from many people.

Just imagine what your team could accomplish if they had an electronic teamroom: a private, secure digital workspace where you all could assemble. You'd share files and information; hold discussions, create and store documents; and track your progress without leaving your desks. And it wouldn't matter where you were located; you could use the World Wide Web to collaborate.

If you think this is a dream, it's not. Burke Consortium and Livelink can make it your reality! From strategy to deployment, implementation, migration and training, Burke Consortium makes Livelink work for you. Contact us for a demo CD to see how we can put the power of Livelink to work for your team!

Our Values

Our mission is to make a difference by helping those who help others. Passion drives us. Faith sustains us. We value competence. We believe in life-long learning. Our reward is the confidence of our clients.

People

Processes

Technology

Albert Einstein said it best.

"Each of us comes for a short visit, not knowing why, yet sometimes seeming to divine a purpose. From the standpoint of daily life however, there is one thing we do know: that man is here for the sake of other men – above all for those upon whose smile and well-being our own happiness depends, and also for the countless unknown souls with whose fate we are connected by a bond of sympathy. Many times a day I realize how much my own outer and inner life is built upon the labors of my fellow men, both living and dead, and how earnestly I must exert myself in order to give in return as much as I have received."

Enterprise Architecture

An enterprise architecture translates an organization's mission and strategy into information technology solutions that work for employees, customers, suppliers and partners. Burke Consortium develops enterprise architecture solutions that result in effective IT operations. Our approach improves system integration of legacy data, provides effective connection to external systems, reduces data redundancies, and provides direction and guidance for future technology investments. Our team has decades of experience developing and implementing roadmaps for successful enterprise migration. Our enterprise architecture products include:

eaframework](http://www.bcinow.com/navsea/eaframework)

- Enterprise Architecture Framework
- Corporate IT Vision
- Operational, Systems and Technical Architecture Views
- IT Standards and Guidelines
- IT Policies
- Guidelines for Creating and Maintaining Portals and Community Websites

If you need assistance with enterprise architecture initiatives, call Burke Consortium. We can identify, map and design an enterprise architecture and implement the infrastructure that will make your dreams come true. We specialize in architectures for eGovernment and knowledge management solutions that solve mission critical problems. For more information, contact us to explore how we can help.

Shipboard Networks

Burke Consortium installs and enhances non-tactical information systems onboard nuclear submarines. We configure, install, test, and upgrade software and train submarine crews in the use, operation, and maintenance of onboard networks, servers and RAID arrays. We also design and deploy internet products throughout the submarine community.

Our staff consists of nuclear-trained submarine reserve officers, former submarine community civilian personnel, and former submarine shipbuilder employees.

Virginia Class Submarine Website
www.vaclass.navy.mil

We understand the submarine community and know what it takes to perform in the mission-critical environment. Whatever your goals may be, you need a company that deliver results each and every time in an environment where failure is not an option. Your success is our most important product, and we take that responsibility very seriously.

Contact our Network Team to see how we can help you make your dreams a reality.
